Coltelli reversibili in hw (hm integrale) a botte
*Hw (integral tungsten carbide) reversible inserts
 with bevelled angles*

DESCRIZIONE / DESCRIPTION

Coltellini piani in HW(Hm integrale) con due taglienti, spogliati a 35 gradi totalmente rettificati a tolleranze centesimali. Gli angoli ai quattro vertici sono smussati in modo da favorire la sovrapposizione evitando segni sulla superficie del pezzo lavorato. Indicati per legni teneri duri e incollati.

HW (integral tungsten carbide) straight inserts with two cutting edges , rake angle 35 degrees and completely refaced at centesimal tolerances. The shape of insert with bevelled angles, permits an excellent finishing without any lines on the wood surface. Suitable for hard wood, glued panels, chiboard, plywood, laminated panels etc..
